Most Effective Environmental Educators: BRONZE Aisha Bint Abi Baker School, Abu Dhabi

The teachers from this school ensure that they attended all the TOT trainings conducted by the agency this year which covered topics on Blue Carbon & Mangrove Ecosystems, Birds, Fisheries, Energy Education, Climate Education using the Art of Puppetry, Becoming an Effective Environment Educator and on Air Quality.

All the teachers who attended the above trainings ensured that they went back and shared the lessons with all the teachers in their school. Sharing the TOT is the first prerequisite for an award in the TOT category.

The second part deals with the level of integration and application into the school's curriculum of the lessons learnt from the trainings. They have started applying all of the activities and tasks with the students in all the subjects taught in the school.

Moreover the school management motivates and supports the teachers to attend trainings and share the knowledge gained within the school.
