Best Green Audit: SILVER Al Maseera School, Al Showaib

Although this school joined the programme for the first time this year, they were able to successfully complete their green school audit accurately. They realized the issues in the school for the results of the audits and used that information wisely to bring about new sustainable practices in the school.

The introduced new policies inside the school, and conducted awareness campaigns within the school community. The teachers gave lectures and introduced projects involving many school teachers and students in the implementation phase. The received gold award in the Best Managers Award for the Air Category, primarily for their project on increasing the number of people travelling by shared means and solving the odour issue inside the school.

They also managed to reduce their water consumption and their energy consumption and they also increased their green areas. Moreover they have very clear plans and projects laid out for the next year where they hope to continue on this journey towards sustainability that they have just recently embarked upon.
