Most Proactive School: Outdoor Field Education **BRONZE** Liwa International Private School

The Liwa International School in Al Ain, took **995** students out through **9** field trips from the Kindergarten level to intermediate level. The field trips were conducted to various locations that supported Environment Education and learning by interacting with nature. Apart from the stats of their field trips, it was the integration and follow up reporting that gained those points. A report was prepared for each field trip highlighting the positive as well as negative outcomes and any suggestions that they may have.
